We stayed at the Resort for only one night unfortunately - you really need more like a long weekend to enjoy all the benefits this resort has to offer. My husband and I stayed there to celebrate our first year anniversary and we were welcomed as if we had been royalty. Some of the bad reviews we had read didn't reflect our experience. The grounds are beautiful, the pool was inviting and the service was extremely helpful. When we arrived at the front desk they instantly congratulated us on our anniversary which showed that someone was listening when I made the reservation. The room we were given was beautifully decorated, very Santa Fe. The aromas in the spa were so relaxing that they instantly put me in the right frame of mind for the treatments I was to receive.. Dinner was excellent, the steak was cooked to perfection and the atmosphere was extremely romantic. They sat us in the outdoor patio, in front of the fireplace with the smell of pinion lingering in the air. In addition, they had a spanish guitar player who played the most romantic music which added to the ambience . As we looked beyond the mountains we witness the most amazing sunset.

We loved the warmth and atmosphere of this beautiful resort.
